

GABOR SZAKAL

FIRM cont'd

Gabor M. Szakal, the founder of Gabor M Szakal Consulting Engineers, has extensive international engineering experience in the design of MEP systems for architectural projects that range from high-end residences to a new, 26-building university campus with a construction cost of \$1.5 billion dollars. Known for his versatility and depth of expertise, Gabor is equally skilled in commercial, institutional, research and residential projects. His breadth of expertise assures an understanding of all MEP system requirements and the inventiveness to respond with new and appropriate solutions.

GMS's services are distinguished by Gabor's understanding of and respect for design aesthetics, his attention to detail and his responsiveness and willingness to work with architects to fully realize their design vision. It is his commitment to design that prompted one architect to call him "**an architect's engineer.**"
